

In recognition of State Regulation No. 637, Kazoo School is participating in an “Integrated Pest Management Plan” (IPM). The intent of this Michigan Law is to reduce the need for chemical pesticide application by using a site-specific plan that continually evaluates potential problems and uses other control measures before turning to chemical controls as a last resort.

According to this law, you have the right to be notified prior to any pesticide application made to the school grounds and buildings, or immediately after any emergency application. If you wish to receive advance notification, please complete the form below and return it in care of the office.

Sincerely,  
Sonita Newbury-Schau  
Head of School
